Phased Roadmap

4. Data Sources & Methodology

1. Executive Summary

This report presents a comprehensive SEO audit of **davidgeha.dev** for a **Local service-area business — solo AI consultant, Beirut, Lebanon (professional services)** site, generated on September 19, 2026. Findings combine technical, content, schema, performance, visual, and search-readiness evidence as available.

56/100

SEO HEALTH SCORE

Critical Issues Found:

1. Not indexed by Google: site:davidgeha.dev returns nothing; no GSC property exists
2. Entity collision: 'David Geha' on the open web resolves to a TV producer; zero corroboration of the AI-consultant entity
3. Page-type mismatch: 205-word portfolio landing vs SERPs dominated by directories and 650-2,500-word priced service pages
4. No Google Business Profile, no phone, zero citations (Local SEO 16/100)
5. Live FAQPage schema has no visible FAQ (policy violation; fixed in working tree)

Quick Wins:

1. Deploy the working tree (+18 health points)
2. Verify in Google Search Console, submit sitemap, request indexing; add the jarvis service account as a user
3. Create Google Business Profile as service-area business with the exact name 'David Geha - AI Consultant'
4. Fill GitHub/LinkedIn/Instagram profiles with bio, Beirut, and the site URL
5. Set the www -> apex redirect at the Vercel domain level

2. Audit Categories

2.1 Technical SEO

Score: **68/100**

What Works

- HTTPS+HSTS
- TTFB 53-56 ms
- http->https 308
- self-referencing canonical
- robots.txt allows all AI crawlers
- valid declared sitemap
- agent_ux_check 100/100

Findings

FAQPage schema without visible FAQ **Critical**

Live page has 4 Q&As in JSON-LD and none in the DOM.

Recommendation: Fixed in working tree: Faq.jsx + generated JSON-LD. Deploy.

Non-JS crawlers see 46 words **High**

Client-rendered SPA; raw HTML is a two-line noscript stub.

Recommendation: Fixed in tree: prebuild sync-static mirrors Services+FAQ (726 words) into noscript. Prerender/SSG for Phase 3 pages.

IndexNow key file 404 in production **High**

Key exists locally only.

Recommendation: Deploy, then submit via indexnow_submit.py.

www.davidgeha.dev serves 200 **Medium**

vercel.json host redirect not effective; duplicate crawlable host.

Recommendation: Set project-level domain redirect (www -> apex, 308) in Vercel.

Missing security headers **Low**

Only HSTS present.

Recommendation: Fixed in tree: vercel.json headers (nosniff, X-Frame-Options, Referrer-Policy, Permissions-Policy).

2.2 Content Quality

Score: **42/100**

What Works

- No filler or AI-pattern phrasing (content_quality 83)
- Specific first-person bio with AUB and named stack
- Dated builds timeline

Findings

Thin content **High**

205 words main copy vs 2,000+ on ranking pages.

Recommendation: Working tree adds ~750 words; add case-study metrics and a 600-900 word 'how AI consulting works in Lebanon' section.

Target phrases absent from visible copy **High**

'AI consulting' 0, 'AI solutions' 0, 'Beirut' 0 on live page.

Recommendation: Fixed in tree via Services/FAQ headings and hero H2.

Zero proof signals **Medium**

No metrics, testimonials, client names, dates.

Recommendation: One anonymised metric + 2-3 sentence case study per build.

Readability **Medium**

FRE 33 / grade 11.7 live; 11 long sentences in pending copy.

Recommendation: Split sentences over 25 words.

No visible contact block **Medium**

Email only in mailto; osgdev.com domain unexplained.

Recommendation: Add Beirut contact block with email/phone; align or explain the email domain.

2.3 On-Page SEO

Score: **45/100**

What Works

- Title within length and query-aligned
- Meta description present
- Single canonical

Findings

H1 lacked keyword **High**

Rendered H1 was the wordmark 'DavidGeha'.

Recommendation: Fixed in tree: 'David Geha - AI Consultant in Lebanon' (sr-only tail).

#services anchor mislabeled **Medium**

Nav 'services' landed on Recent Builds.

Recommendation: Fixed in tree: new Services section owns #services.

Three intents on one URL **Medium**

'AI solutions Lebanon' is a catalog intent.

Recommendation: Dedicated pages: /ai-consulting-lebanon/, /ai-solutions-lebanon/ (Phase 3).

2.4 Schema / Structured Data

Score: **76/100**

What Works

- Valid JSON-LD @graph in raw HTML

- Person/ProfessionalService/WebSite linked by @id
- No deprecated types

Findings

Missing service catalog, city, contact, WebPage **Medium**

areaServed country-only; no offers/geo/email.

Recommendation: Fixed in tree: OfferCatalog, City Beirut (Wikidata), geo, email, priceRange, WebPage, disambiguatingDescription, clean NAP name.

FAQPage has no Google rich result since May 2026 **Info**

Kept for Bing/AI consumers; now content-honest.

Recommendation: No further investment.

2.5 Performance (CWV)

Score: **82/100**

What Works

- TTFB 53-56 ms
- TBT 0 ms
- CLS 0 / 0.013
- Small DOM (236 nodes)

Findings

Intro curtain blocks content 2.45 s every visit **Critical**

Trace: real content at 3,722 ms mobile.

Recommendation: Gate to once per session and/or shorten to ≤ 800 ms (design decision).

1.43 MB hero PNG **High**

74% of page weight.

Recommendation: Fixed in tree: WebP 205 KB, verified in WebGL; PNG removed.

Google Fonts render-blocking chain **High**

~1.8 s mobile savings flagged despite preload swap.

Recommendation: Self-host 4 font files with preload.

srcset picked 1280w on mobile **Medium**

sizes too loose.

Recommendation: Fixed in tree: sizes=(max-width:768px) calc(100vw - 48px), 640px.

Unused JS 48.5 KB **Medium**

WebGL + below-fold code in main chunk.

Recommendation: Dynamic-import HeroPortrait and below-fold sections.

2.6 AI Search Readiness

Score: 40/100

What Works

- robots.txt open to all answer engines
- llms.txt present
- Entity-named noscript
- Interlinked JSON-LD

Findings

Entity collision, zero corroboration **Critical**

All web results for the name are the TV producer; no profile/directory links the site.

Recommendation: Profiles + directories + GBP + sameAs; disambiguatingDescription added in tree.

No question headings / citable passages **High**

Zero question H2/H3s, zero 134-167 word passages live.

Recommendation: Fixed partially in tree (FAQ H3s, service blocks); make About third-person entity-first.

No proof or dates **Medium**

publication date inferred.

Recommendation: dateModified added; add case-study metrics and an Updated line.

YouTube presence is 100% the producer **Medium**

YouTube is the strongest AI-citation correlate.

Recommendation: 3-5 titled pipeline walkthroughs.

2.7 Images

Score: **55/100**

What Works

- WebP thumbnails
- Lazy loading

Findings

No responsive variants / dimensions / descriptive alts **Medium**

1280w served at 634px; alts were bare titles.

Recommendation: Fixed in tree.

2.8 Local SEO

Score: **16/100**

What Works

- SAB pattern correctly signalled
- ProfessionalService is the correct type
- gbp_deprecation_lint clean

Findings

No Google Business Profile **Critical**

25%-weight dimension at 0.

Recommendation: Create SAB GBP; name 'David Geha - AI Consultant'.

No phone / WhatsApp Critical

Blocks GBP verification and directory listings.

Recommendation: Publish a number; add telephone to schema.

Zero citations Critical

Not on Clutch/GoodFirms/Manifest/TechBehemoths/Consultancy.org/Lebanese directories.

Recommendation: Prioritized list in ACTION-PLAN #10.

Business name inconsistent High

Keyword-stuffed variants between live and pending.

Recommendation: Fixed in tree; lock the string before first listing.

2.9 Backlinks

What Works

- Niche is not saturated: only zfort.com and eurisko.net appear in Common Crawl

Findings

Zero known backlinks High

Domain absent from cc-main-2026-jan-feb-mar; Tier 0 sources only.

Recommendation: AUB .edu.lb, GBP, LinkedIn Services, Berytech, Clutch, GoodFirms; free Moz key for a numeric score.

2.10 Search Experience (SXO)

Score: 43/100

What Works

- Desktop above-fold complete
- Fast, no layout breakage

Findings

Page-type mismatch **High**

Portfolio landing vs directory/service-page SERPs; single-URL ceiling ~60.

Recommendation: Page set: /, /ai-consulting-lebanon/, /ai-solutions-lebanon/, guide article, /work/*, /about/.

Trust lowest for every persona **High**

avg 6.4/25; vendor-shortlister persona 26/100.

Recommendation: 'At a glance' block (Beirut, from \$X, 2-week sprints, EN/AR/FR), priced offers, testimonials, directories.

Mobile CTA below fold; no mobile nav **High**

CTA at y=824 on 812-px viewport; nav hidden <=1024px.

Recommendation: Resize hero at <=768px; add minimal menu.

3. Action Plan

Phase 1: Critical Fixes Week 1

- Deploy working tree
- GSC verify + sitemap + request indexing + add service account
- IndexNow submit
- Bing import from GSC
- www -> apex redirect at Vercel
- Fill GitHub/LinkedIn/Instagram profiles

Phase 2: High-Impact Improvements Weeks 2-3

- Google Business Profile (SAB)
- Publish phone/WhatsApp + schema telephone
- Lock NAP string
- Directory citations (Clutch, GoodFirms, Manifest, LinkedIn Services, TechBehemoths, Consultancy.org, Sortlist, Crunchbase, Bayt, Yellow Pages LB)
- AUB .edu.lb link
- Berytech / UK-Lebanon Tech Hub / ArabNet
- Self-host fonts
- Loader once-per-session
- Mobile hero/nav fixes
- Third-person About + Updated line

Phase 3: Content & Authority Month 2

- /ai-consulting-lebanon/ (priced offers, FAQ, case studies)
- /ai-solutions-lebanon/ catalog
- Guide article 2,000+ words
- /work/<slug>/ case studies x3-4
- /about/ entity page
- All pre-rendered static HTML
- YouTube walkthroughs x3-5
- LinkedIn article monthly, Reddit answers

Phase 4: Monitoring & Iteration Ongoing

- Google API key -> monthly /seo google
- Moz key -> /seo backlinks
- /seo drift compare after each deploy
- Re-run /seo audit after Phase 3; target Health ≥ 85

Data Sources & Methodology

Source	Description	Update Frequency
PageSpeed Insights API	Lighthouse lab audit (mobile emulation, Moto G Power, slow 4G)	Real-time
Chrome UX Report (CrUX)	28-day rolling field data from real Chrome users	Daily ~04:00 UTC
CrUX History API	25-week p75 trend data per metric	Weekly
Google Search Console	Search Analytics (clicks, impressions, CTR, position)	2-3 day lag
URL Inspection API	Per-URL index status, coverage state, crawl info	Real-time (2,000/day)
